Geol

AI-Powered Place Exploration

Voice · Maps · History · AI

Vivek Gandhari · Abhishek Pillai · Sasank Gurajapu · Anand Singh

THE PROBLEM

Discovering a place is fragmented.

Too Many Apps

Google for reviews, Zillow for housing,
Wikipedia for history, YouTube for visuals.

No Time Context

No tool shows how a place looked or
felt across different eras of history.

No Voice Layer

Every tool requires typing. None are built for hands-free exploration.

THE SOLUTION

Geol — One voice, every dimension of a place.

Voice In / Out

Web Speech API — speak naturally, hear answers back

Agentic AI

Gemini 2.0 Flash orchestrates multi-tool reasoning

Location-Aware

Auto-detects or accepts any typed/spoken location

Historical Time Travel

Imagen 3 reconstructs how a place looked across eras

Street View

Live current imagery via Google Street View Static API

Fun Facts & Lore

Surprising, delightful stories narrated about any place

TECH STACK

Built entirely on Google + open-source.

Frontend	Backend	AI / ML	Google APIs
React (TypeScript)	Deno runtime	Gemini 2.0 Flash (chain)	Maps JS + Places API
Vite · Tailwind CSS v4	Hono HTTP framework	Imagen 3.0 (chain)	Street View Static API
shadcn/ui · react-google-maps	Supabase Edge Functions	Web Speech API (voice)	Geocoding API

GEOL

Every place has a story. Geol tells it.
